## + EMPLOYMENT

---

- 2017-Present    Self Employed  
Freelance Web Developer  
I am currently working a full stack freelance web developer; I get most of my contracts from Upwork. ~85% of the jobs I take are in WordPress, usually a custom theme or plugin. This will generally involve integrating with third party APIs as well.
- 2016-2017    Freestyle Creative  
Lead Web Developer  
I was responsible for the development of all client and internal websites from start to finish. Also worked with other developers and designers to coordinate multiple client projects at the same time. Every website build was done using WordPress.
- 2015-2016    Self Employed  
Freelance Web Developer  
I worked as a Freelancer on various different web development projects for numerous clients. Primarily built custom WordPress themes based on provided designs.
- 2011-2015    GOES LLC  
IT Director  
I was responsible for sever maintenance and all in-house web development, including maintaining a backend portal for all the distributors of the company.
